

# Voice Tally

## TallyMaster 9

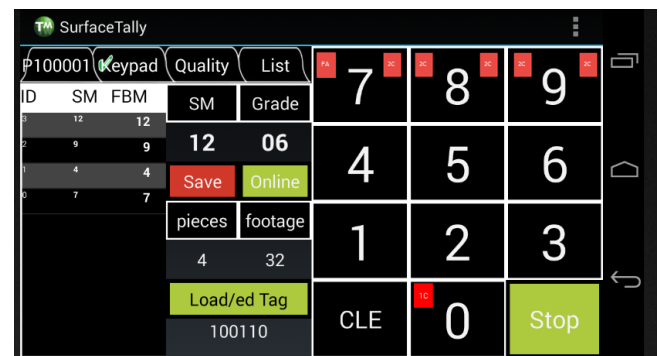

**TallyMaster 9 Voice Tally delivers** a full stand-alone voice tally system capable of meeting your needs for data collection. With **TallyMaster 9 Voice Tally** running on virtually any Android Smartphone or Tablet you can meet the demanding needs of production while at the same time ensuring your data entry needs are met.

**TallyMaster 9 Voice Tally provides** complete real-time system integration to TallyWorks or TallyWeb and is compatible with almost every known Bluetooth headset. Using TallyWorks and Voice Tally, Costing is always accurate, as costs are added at each stage of production.

**Unsurpassed Reporting-TallyMaster 9 Voice Tally** when working in conjunction with TallyWeb or TallyWorks incorporates Microsoft SQL Server Reporting Services giving you a flexible tool to create your own custom reports or choose from reports available through the TallyWeb store. There is essentially an unlimited amount of reporting you can do with customizable designs, making each report yours.

**Same Day Installation** -TradeTec's highly skilled IT staff will have the system configured within just a few hours so your personnel will be up and running the same day. You will be amazed how quickly Voice Tally learns each unique voice and how easy it is to use.

**Power in the palm of your hand-TallyMaster 9 Voice Tally** runs on Android platforms from a Smartphone, Tablet or Android TV giving your tally person an instant view of the tallied information on a large 60 inch monitor. In addition, because it's scalable you can add as many workstations as you need - even your forklifts can be outfitted!
